

Applied Assurance Technologies

PAC — Procurement Assurance Companion

Federal Procurement Assurance | Evidence-Grounded Regulatory Reasoning

Applied Assurance Technologies LLC (AAT) develops PAC to help acquisition teams identify regulatory, clause, policy, structural, and documentation issues before solicitation, award, or obligation — while preserving the judgment and authority of government acquisition professionals.

Core Capabilities

- Pre-solicitation, pre-award, and pre-obligation acquisition-package review.
- Clause and provision applicability review, Section I checks, structural validation, and document-completeness checks.
- Evidence-grounded regulatory reasoning using applicable authority, agency policy, and supporting acquisition evidence.
- Traceable findings, reviewer workflow support, and audit-ready review records.
- Dedicated deployment and integration support for contract-writing and acquisition systems.

Differentiators

- Deterministic validation combined with AI-assisted analysis.
- Findings tied to source authority and acquisition evidence for professional review.
- Human-accountable review that strengthens — not replaces — contracting and acquisition judgment.
- Configurable rulebooks and agency-specific policy context.
- Dedicated deployment options, including customer-controlled government cloud environments, subject to approved security architecture.

Federal Acquisition Focus

Target users include contracting officers and specialists, procurement review and policy teams, acquisition leadership, and program offices seeking earlier issue identification and more consistent acquisition review.

PAC is designed for high-consequence procurement workflows where regulations, policy, documentation, systems, and professional judgment must work together.
